

YUVIKA SINGODIA

+91-9216630253 singodiayuvika@gmail.com GitHub LinkedIn

Profile Summary

Motivated B.Tech Information Technology student with strong technical fundamentals in programming, software development, debugging, testing, AI, and problem-solving. Passionate about building practical solutions, learning emerging technologies, and contributing with ownership, adaptability, and attention to detail.

Education

SKIT College

B.Tech in Information Technology — CGPA: 8.12 / 10

Expected May 2027

Jaipur, India

Raj Shree Academy

Class XII (RBSE): 84.20% — Class X (RBSE): 92.00%

Skills

Programming: Java, Python, C++, JavaScript

Web: HTML, CSS, React.js

Database: MySQL, SQL, Firebase

Testing: Manual Testing, SDLC, STLC, Debugging, Test Cases, Regression Testing

AI/ML: Generative AI Basics, AI Tools, Chatbot Testing Awareness

Tools: Git, GitHub, VS Code, IntelliJ IDEA

Operating Systems: Windows, Linux, Ubuntu

Relevant Coursework

Object Oriented Programming, Software Engineering, Data Structures & Algorithms, DBMS, Theory of Computation, Compiler Design, Machine Learning, Cloud Computing

Experience

Cognifyz Technologies

June 2026 – Present

Machine Learning Intern

Remote

- Worked on machine learning concepts and real-world datasets for predictive analysis and data-driven solutions.
- Performed data preprocessing, feature engineering, and exploratory data analysis using Python libraries.
- Built and evaluated machine learning models to improve prediction accuracy and performance.
- Gained practical experience in model training, visualization, and handling structured datasets.

Ice Hut Technologies

Jun 2025 – Jul 2025

Advanced Java Intern

- Developed Java-based backend modules using JDBC and Servlets.
- Integrated MySQL database connectivity and handled backend logic.
- Performed testing and debugging to improve module reliability.

SKIT Internship Program

May 2024

Web Development Intern

SKIT College

- Developed responsive web pages using HTML, CSS, and JavaScript.
- Tested UI components and debugged front-end modules.
- Improved functionality and user experience through issue resolution.

Projects

BridgeDrop – Cross Platform File Transfer App

June 2026 – Present

- Building a cross-platform mobile app for secure file transfer between iOS and Android.
- Designing workflows for fast, reliable, and quality-preserving transfers.

AirWrite AI — Python, OpenCV, MediaPipe, EasyOCR

April 2026

- Built a real-time touchless text input system that allows users to write in the air using hand gestures through a webcam.
- Implemented hand landmark detection and fingertip tracking for virtual canvas drawing using MediaPipe.

- Integrated OCR to convert handwritten strokes into digital text and added save, clear, and rotation features.
- Designed gesture-based controls for drawing, navigation, and tool selection with real-time performance optimization.

HireBlind – Full Stack Web Application

Mar 2026

- Built a platform for anonymous interview experience sharing.
- Developed using React, Node.js, Express.js, SQL, Firebase.
- Validated user flows, filters, and posting functionality.

Cadence – Music Website

Jul 2024 – Aug 2024

- Created a browser-based music player with playback controls.
- Implemented and tested track selection, progress bar, and audio controls.

Certifications

- Machine Learning - IBM
- GenAI Bootcamp - Regex Software
- Oracle Academy - Introduction to Java
- Infosys Springboard - C++ Fundamentals
- Red Hat Academy - Linux Fundamentals

Positions of Responsibility

ICI

Content Team Coordinator

- Managed a team of 20 members and coordinated task execution.
- Oversaw content planning, task distribution, and team collaboration.

Unnati Program

Coordinator

- Led 15 volunteers during the SKIT cultural fest.
- Conducted interactive sessions about our culture for 200 students.

Pravah

Content Writer

- Created content for promotions, social media, and brochures for the college's tech and cultural fest.
- Worked closely with teams to ensure clear and engaging communication.
